## SPECIFICATIONS

Medical Coding Lab is an online interactive program designed to make this complex subject matter easier for students to master. The content coordinates with the title “Conquer Medical Coding: A Critical Thinking Approach with Coding Simulations” by Jean H. Jurek, Stacey Mosay, and Daphne Neris.

Medical Coding Lab is compatible with Internet Explorer 9+, and the latest versions of Mozilla Firefox, Google Chrome, and Apple Safari. It also incorporates responsive design, which means it should work on most mobile devices as well as home computers.

Adobe Acrobat or Adobe Reader is required to view PDF files. JavaScript needs to be enabled to view certain features of the program.

## CREATING AN ACCOUNT

Creating an account only takes a moment. Please note that if you are an existing Davis*Plus* member, you do not need to create a new account. Your Davis*Plus* account credentials will work when logging into Medical Coding Lab.

To begin, go to [www.MedicalCodingLab.com](http://www.MedicalCodingLab.com) and click the “Login/Join” button, located in the top right corner of the homepage.

To create an account, click the “Create Account” button.

Next, enter your account credentials:

1. Click the box next to “*Check here for Instructor Access.*”
2. Enter your e-mail address.
3. Create your password.
4. Enter your name.
5. Enter your school information.
6. Click the “Create Account” button.

Complete the information below to create your account

Confirm Password	<input type="text" value="Confirm Password"/>

## DASHBOARD

After logging into Medical Coding Lab, the dashboard will be displayed.

After creating a class, the class information will be displayed on the dashboard.

## CREATING A CLASS

To assign exercises and activities, track students' progress, and have students' grades submitted to the gradebook, the instructor must create a class by clicking the **"CREATE CLASS"** button. Failure to create a class results in student work not being submitted to the instructor gradebook.

### Class Details

After clicking the "Create Class" button, the "Create Class" page opens. This page is also referred to as the "Class Management Wizard." This is where the instructor will enter the class details.

#### Class Title

Instructors add the class title. This is a mandatory field.

Class Title :

#### Class Description

Instructors include a description of the course. This field is optional.

Description :

#### Class Start and End Dates

Instructors enter the start and end dates for the class. This is a mandatory field.

Start Date:   End Date:  

The start date is the date the class will become available to the students. The end date is the date students will no longer be able to access the class or enter work into the instructor's gradebook. The students will still have access to Medical Coding Lab as a resource after the end date, through the duration of their access.

#### Auto-Enroll Students and Auto-Import Grades

Instructors will select "Auto-enroll students" to automatically add students to the class when they submit the Class ID. The instructor will receive a notification for each enrollment. If instructors do not choose to check this box, they will have to approve each student into the class after they enter the Class ID. If the students completed activities in the product prior to being enrolled in the class, the instructor can choose to import those grades. The instructor will select "Auto-Import Grades" to allow

students' progress to be automatically copied into the class gradebook when the students enroll in the class.

Auto-enroll students:	<input type="checkbox"/> ?	Auto-import grades:	<input type="checkbox"/> ?
-----------------------	----------------------------	---------------------	----------------------------

### Class ID

Each class created within Medical Coding Lab will have a unique Class ID. Instructors must provide students the Class ID for them access their Medical Coding Lab class, take the assignments, and submit work to the instructor's gradebook. It is recommended that instructors distribute the Class ID to their students by e-mail, because the program does not distribute the codes to students.

### Confirming Class Creation

There are three elements that confirm that the class has been successfully created. Within each option, the Class ID number is displayed.

1. After entering the class details and clicking the "Save and Continue" button, a pop-up message will open. The Class ID will be included within the confirmation message.
2. The instructor will receive a confirmation e-mail, which also includes the Class ID.
3. The Class ID will be included within the Dashboard view.

## Using Default or Customized Settings

After a class is created, instructors will be asked if they prefer to customize the settings or use the default settings. Using default settings means that **all** of the content of Medical Coding Lab will become available to students in the class at the start date. However, if instructors would like to make adjustments to the settings — such as reordering or removing lessons, choosing different start and end dates for activities, and removing activities the instructors are not interested in using — they should choose to customize settings.

**Message**

Your class currently includes all lessons and exercises. By default all assignments are set with the grading rule "Initial Practice then Grade."

To customize these settings, click OK. To return to your dashboard using the default settings for your class, click Return to Dashboard.

CUSTOMIZE SETTINGSUSE DEFAULT SETTINGS

## Lesson Reorder

Instructors can drag and drop the lessons within the "Lessons Included in Class" column to change the order; move those lessons that are not to be included into the "Available Lessons" column to the right; and then click "Save and Continue." There is also an option to "Reset" if the user would like to start from scratch.

Select display order for Lesson here

Class Management Wizard: [Create Class](#) / [Lesson Reorder](#) / [Lesson Settings](#)

**SAVE AND CONTINUE**

**Lesson Included in Class** **RESET**

Manage the display order of lessons from your class by dragging the lesson titles below to reorder them. By default all lessons are included in your class. To remove a lesson from your class, drag it to the 'Available Lessons' column.

- Your Career as a Medical Coder
- The Regulatory Environment of Coding
- ICD-10-CM Basics
- ICD-10-CM Coding Guidelines

**Available Lessons**

This lists all lessons available for the product. If a lesson is not currently included in your class, it can be added by dragging from this column to the 'Lessons included in Class' column.

- Your Career as a Medical Coder
- The Regulatory Environment of Coding
- ICD-10-CM Basics
- ICD-10-CM Coding Guidelines

**Drag and drop to re-order**

**Drag to the right to remove a lesson from student view**

## Lesson Settings

### Default Settings

#### Default Start and End Dates

From the initial drop-down menu, instructors choose the lesson to focus on. They set the default start and end dates for all assignments within the lesson. After the assignment due date passes, the students cannot submit work to the instructor's gradebook for that lesson. If the instructor decides not to customize this field, the assignment due date will default to the last day of the class.

Select Lesson here

Your Career as a Medical Coder

Set Assignment Start Date for All Assignments in this lesson: 01/01/2018

Set Assignment Due Date for all Assignments in this lesson: 06/01/2018

#### Default Grading Rules

The instructor can set universal grading rules for all exercises within a lesson. They may choose "Grade on First Attempt then Practice" to have the students graded on the first attempt (and then continue to practice without being graded), or "Initial Practice then Grade" to allow the students to practice an activity as many times as they would like, view the results, and retake the activity until they are comfortable with submitting work for a grade. Finally, the "Practice Only" option allows students to work without any grades submitted to your instructor gradebook.

Grading rules for all assignments within this lesson

- ☐ Grade on first attempt then Practice
- ☒ Initial Practice then Grade
- ☐ Practice Only

### Group Assignments

For Short Answer exercises, students write in a text box to answer the question. These exercises are not graded by the program; instructors must manually grade these. Instructors might wish to make these exercises “group assignments.” Choosing this feature allows student submissions to be posted to the Group Discussion Forum, where other students in the group may view the submission and make comments and suggestions.

Instructors may choose to “Continue to Next Lesson” after choosing global settings; however they may also choose to scroll down on the Lesson Settings screen to fine-tune individual exercise settings.

☒ Set All Short Answer Exercises in this Lesson as Group Assignment

CONTINUE TO NEXT LESSON

### Customized Settings

Each type of activity can be expanded and contracted to reveal the exercises included. Users may click on the link of the exercise to view its content in a separate tab. Start and end dates, grading rules, and group activity settings will populate automatically based on the default settings previously chosen; however, the user can make adjustments on an individual level here.

Once the settings of one lesson and its activities are complete, instructors click “Continue to Next Lesson” to save those settings and move forward to the next lesson. If they have completed all of their settings, they instead choose “Exit Lesson Settings” to return to the dashboard.

## Activity Types

Medical Coding Lab offers a number of activity types for the students to complete.

### e-Book by Lesson

The interactive e-Book can be accessed directly in the product, divided by lesson. Students can alternatively access the comprehensive e-Book through the "e-Book" link at the top of the page.

Medical Coding Lab for Conquer Medical Coding

FLASH CARDS  
DONT TIP THE SCALE  
SHORT ANSWER

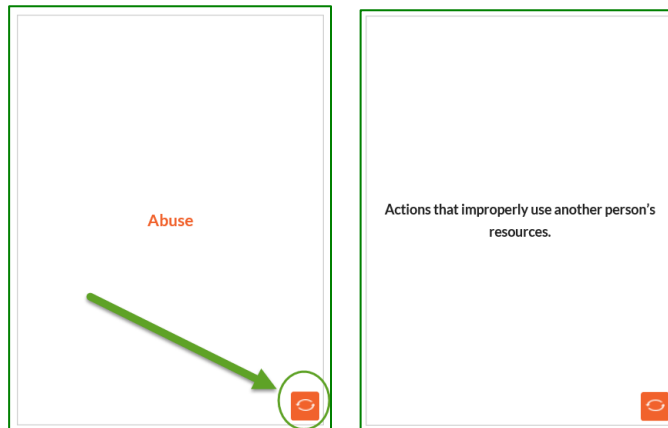

e-Chapter  
Not Started | Non-gradable  
Start Date: Not Set  
End Date: NA

Instructors also have access to the e-Book via their dashboard.

### Flash Cards

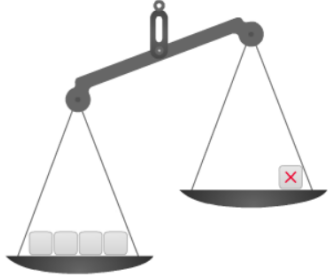

Key terminology is presented in electronic flash cards. Like the rest of the product, these can be accessed on handheld devices so that students on-the-go can review them wherever they are, whenever they want.

### Don't Tip the Scale

This is a terminology game in which students are provided a clue about a term and then select letters to spell it. Guessing too many incorrect letters causes the scale to tip.

1. Legislation designed to protect people's private health information

⏪ Question 1 of 5 ⏩

### Short Answer

Students type their answers to the questions in the fields provided, and then submit. These questions are not automatically scored — the instructor either needs to manually review them or set them up as Group Assignments.

1. Medical coders need to protect the information in a patient's records, especially when it comes to sharing the information with providers and payers. Explain the four main purposes of the **Health Insurance Portability and Accountability Act (HIPAA)** law. What are the three key HIPAA administrative simplification provisions? Describe the four ways in which the **HIPAA** law helps coders to protect patient information.

SUBMIT

Question 1 of 1

### Analyze the Codes

CPT lessons include this activity, in which the student selects all of the pertinent elements for an accurate CPT code assignment. Other elements may be provided that would not be appropriate for that code.

1. Which of the following options apply to code 45330? *Select all that apply.*

- ☐ A. Diagnostic
- ☐ B. Therapeutic
- ☐ C. Before splenic fissure
- ☐ D. Beyond splenic fissure
- ☐ E. To cecum
- ☐ F. Biopsy
- ☐ G. Forceps
- ☐ H. Brushing

SUBMIT

Question 1 of 2

### Build Medical Codes

For ICD-10 lessons, students are provided case scenarios and then continue to code the patient diagnosis through a drag-and-drop activity. Correct answers are provided after the student submits the work.

1. What is the diagnosis code for diabetic ulcer?

[View your case](#)

Kyle is a 12-year-old patient who presents to his pediatrician today for an annual wellness examination. Kyle is due for his MMR vaccine today and the provider discusses the HPV vaccine with Kyle as well as his mother. The provider spends approximately 15 minutes explaining both vaccines and answering some concerning questions Kyle's mother has regarding boys receiving HPV and other concerns that center on the MMR immunization.

1. What is the correct Current Procedural Terminology (CPT) code for the measles, mumps, and rubella (MMR) vaccine?

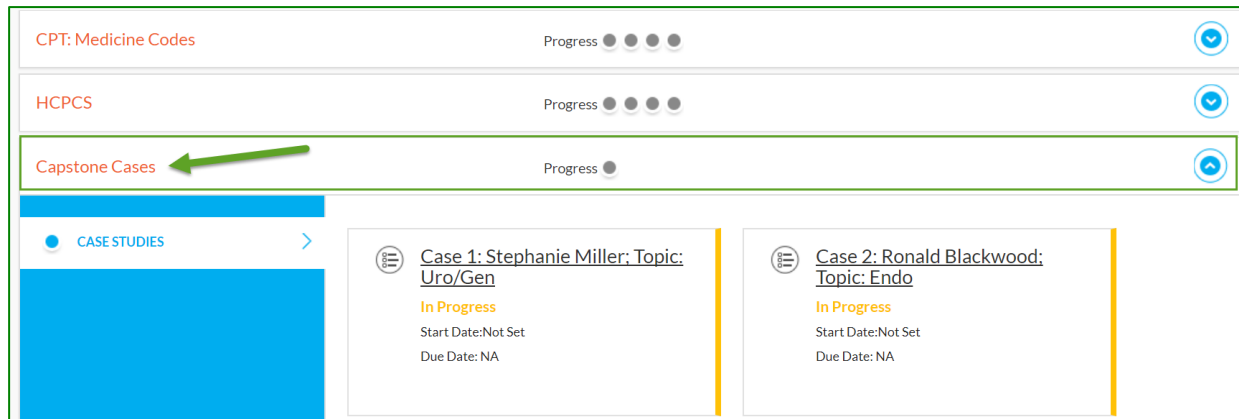

- ☐ A. 90704
- ☐ B. 90705
- ☐ C. 90706
- ☐ D. 90707

SUBMIT

Question 1 of 6

## Capstone Cases

In this area, a more complicated patient scenario is provided, often with comprehensive operative notes, radiology reports, or physician notes, followed by multiple choice questions. Correct answers, with rationales, are provided after the student submits the work. This is a standalone section with a total of 15 cases; each Capstone Case requires knowledge about ICD-10, CPT, and HCPCS coding. Lesson case studies (see above) require knowledge only of that particular lesson. Again, if students need to review the scenario while answering questions, they may click on the dropdown at the top to reveal the text.

View your case

SUBJECTIVE: Ronald is here for his diabetes 6-month follow up. He rarely checks his blood sugar—he has done so only two or three times in the last 2 weeks—and he is noncompliant with medication. He has had diabetes for 7 years. It has been in the 140s for 2 hours postprandial. He is off all medications for blood pressure and diabetes. He lost 6 pounds before the last visit and lost another 7½ pounds by today's visit because of dietary changes. His BMI is 30.2. He does get some heartburn. Two months ago, he had chest pain for a half a day with some shortness of breath, which totally resolved. By history, it really doesn't sound cardiac. We discussed multiple related aspects of diabetes monitoring and lifestyle interventions.

OBJECTIVE: BP, 140/98. HR 72. Funduscopic eye examination is negative. Nose, mouth, neck, and thyroid are negative. Heart is without murmurs. Good pulses. Lungs are clear; abdomen unremarkable. Feet do not show any injury or damage to the skin.

LABORATORY: ECG shows nonspecific ST changes only. Random Accu-Chek, 267; hemoglobin A1c, pending. Chest x-ray is unremarkable.

ASSESSMENT:

1. Type 2 diabetes, suboptimal control
2. Overweight but improving
3. Elevated blood pressure
4. Noncompliance with medical therapy
5. Chest pain

PLAN: Await hemoglobin A1c. Redouble efforts in diabetes monitoring. Recheck blood pressure in 2 weeks. The patient was instructed to call immediately if chest pain returns, but no further workup is done at this time. The patient is to return in 3 months when we will check his kidney status again, earlier PRN.

1. The vital signs noted in the examination according to 1997 Documentation Guidelines (DGs):

- ☐ A. Meet the requirements with two vitals documented
- ☐ B. Do not meet the DGs because of only one blood pressure reading being documented
- ☐ C. Do not meet the DGs because a minimum of three vital signs must be documented to support this bullet
- ☐ D. Do not meet the DGs because ALL vitals listed in 1997 DGs must be documented

SUBMIT

Question 1 of 5

Instructors might want to use Capstone Cases as part of a final grade, in which case the instructor should set the Lesson Settings to "Grade on First Attempt then Practice." Rationales are provided with the answers for the questions, when submitted.

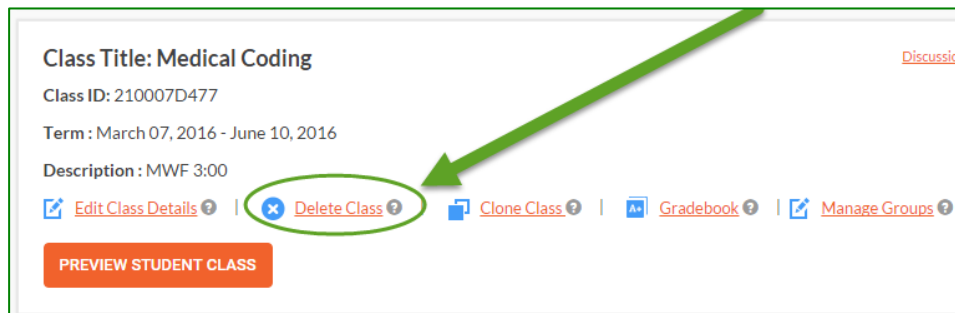

## EDIT CLASS

To edit a lesson after the class is created, instructors click the “Edit Class Details” button on the dashboard.

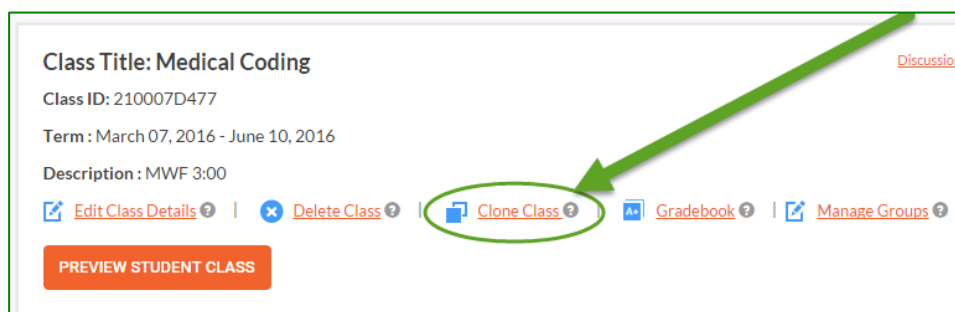

## DELETE CLASS

To delete the class, instructors click “Delete Class” on the dashboard and approve the validation message.

## CLONE CLASS

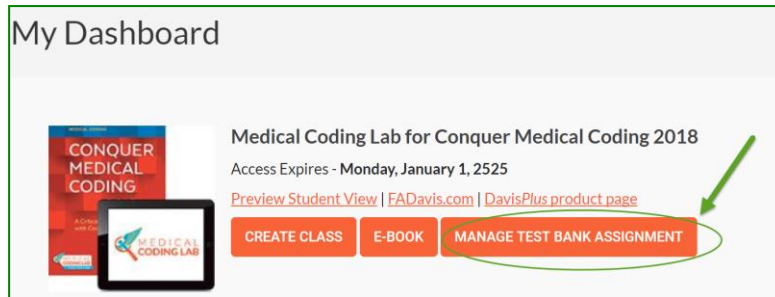

If an instructor teaches the same class to multiple sections or from semester-to-semester, they may want to copy, or “clone,” the class. To clone a class, instructors click “Clone Class” on the dashboard, and then adjust the class customization settings as needed.

## TEST BANK – 2018 VERSION ONLY

### Accessing the Test Bank

Medical Coding Lab 2018 offers a built-in test bank feature. From the Dashboard, click **MANAGE TEST BANK ASSIGNMENT**. From here, you can create new assignments; Preview, Edit or Delete existing assignments; or make assignments to a class.

### Creating New Assignments

Click on **CREATE NEW ASSIGNMENT** to start.

A name for the assignment is auto-generated. You can accept this or provide a new name. Then select **CREATE QUICK ASSIGNMENT** or **CREATE CUSTOM ASSIGNMENT**.

- **Quick Assignment**

A Quick Assignment asks you for the question parameters (one, several, or all lessons) and the number of questions to include. It will randomly generate an Assignment based on those choices.

- **Custom Assignment**

A Custom Assignment asks you for question parameters (one, several, or all lessons) and question type. Then, from the list of questions generated, you will be able to select the questions you'd like to include in that Assignment.

You may flip through pages of results or use the keyword search engine. As questions are selected, they are added to the queue at the bottom of the screen.

Step 1: Assignment Details   **Step 2: Define Assignment Parameters**   Step 3: Select Questions   Step 4: Review Assignment

Choose Filter Parameters:

Select Lesson(s)

- ☐ Select all
- ☐ Chapter 1
- ☐ Chapter 2
- ☐ Chapter 3
- ☐ Chapter 4
- ☐ Chapter 5
- ☐ Chapter 6
- ☐ Chapter 7

<input checked="" type="checkbox"/>	Which ICD-10 convention is used to instruct the coder that a condition is not included here?	Chapter 3	MCSS	<a href="#">View Details</a>

### Review Assignment

Whether you create a Quick or Custom Assignment, the final step is to review it. You have the following options...

- Edit the name.
- Set a time limit in minutes.
- Determine order in which the questions appear by either dragging and dropping the questions into place or by clicking on "Randomize Question Order".
- Replace/remove questions.
- Review the question and its answer by clicking on **VIEW DETAILS**.
- When finished, click **SAVE AND EXIT**. The new Assignment will appear in the **TEST BANK ASSIGNMENT** screen now, where you can preview, edit, or delete it at any time.

\*Assignment Name:

## CLASS ADMITTANCE

Once an instructor has created a class and shared the Class ID with the students, the students will "Insert Class ID" within Medical Coding Lab to join the class. **If the instructor did not check the "auto-enroll students" checkbox when they created that class, they must admit the students into the class before the students can view assignments and submit work to the gradebook.**

When a student is waiting to be admitted into a class, an alert will be displayed on the Dashboard. The number of students waiting to be admitted will be displayed next to "Students." To admit or reject students into a class, instructors click the "Students" button.

## Student Enrollment

To begin admitting students into a class, instructors locate the student's name on the Notifications area on the "Students" page.

## Admitting/Rejecting Admittance

To accept a student into the class, instructors click the "Accept" button to the right of the student's name. Next, they confirm the student enrollment by clicking "OK." An "Enrolled" confirmation message will be displayed after the instructor has accepted a student into the class.

An instructor may choose to prevent a student from joining their class. To do this, the instructor clicks the "Reject" button next to the student's name. The instructor may also enter a reason for rejecting a student prior to rejecting them from the class; this is an optional field. A confirmation message will be displayed after the student is rejected from the class.

Instructors can bulk-approve or -reject students by clicking the "Select All" button and then clicking "Accept All" or "Reject All."

## MANAGE INSTRUCTORS

Instructors have the ability to add multiple instructors to a class by clicking on "Instructors," and then "Add New." Instructors enter an e-mail address to invite another instructor to the class. If the instructor is already registered on DavisPlus, their information will be populated on the next page; otherwise, the user enters the info.

### Manage Instructor

[Return to dashboard](#)

ClassID: 210007D477  
 Class Name: Medical Coding  
 Class Description: MWF 3:00  
 Class Term: March 07, 2016- June 10, 2016  
 Master Instructor: Eric Van Osten

**Course Instructors**

Instructor Name	Email	Access Type	Status	Lead	Action
Eric Van Osten	evo@fadavis.com	Master	Approved	True	

**ADD NEW**

The instructor will be prompted to choose the type of access to grant to the new instructor (click the question mark icon for help). If the instructor is already a registered user of *DavisPlus*, their status will change to “approved” after closing the alert window. If the instructor is not yet a registered user of *DavisPlus*, their status will remain “pending” until they complete their registration, which will then be followed by our internal approval process (24 business hours) before the status is updated to “approved.”

### Add Instructor to class

Search Instructor:

**1** **SEARCH**

**Search Results**

Name	Email
Colleen Keenan	cvk@fadavis.com

Select Access Type :

Lead : ☐ ?

**2** **Full Access**

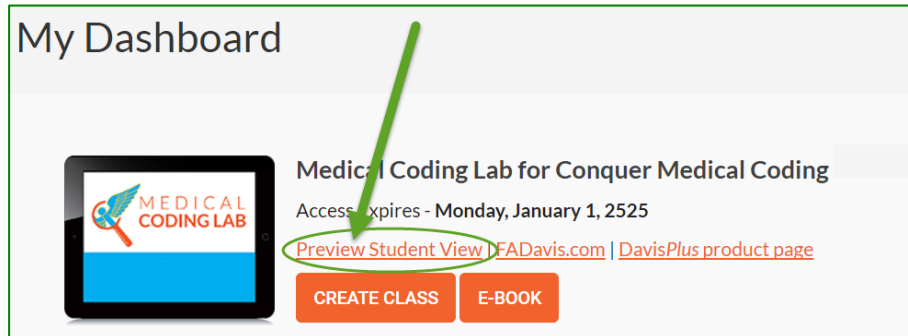

**3** **ADD**

**?** Click here for more information on Access Types

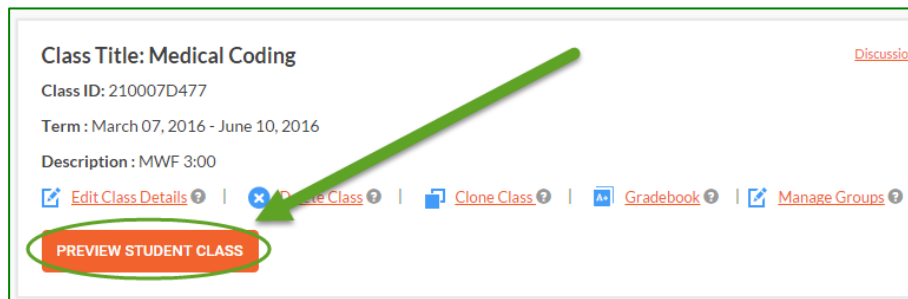

The initial instructor (and any instructors who have been granted “Full Access” rights) always has the option to add more instructors, edit the type of access for existing instructors, or remove instructors from a class.

## 'PREVIEW STUDENT VIEW' VS. 'PREVIEW STUDENT CLASS'

On your Dashboard, select **Preview Student View** to review all lessons and activities “out of the box” – in the standard layout presented to the students.

Or, select **Preview Student Class** to review content for a specific class you've created and customized.

## ASSIGNMENT

**Short Answer exercises are not graded by the tool.** When a Short Answer exercise needs to be graded by an instructor, an alert will appear on their dashboard with the number of assignments that are waiting to be graded.

### Grading Short Answer Exercises Manually

To grade a short answer exercise manually, the instructor clicks “Assignments” and then the exercise name.

Student Name	Email	Lesson Name	Exercise Name
Eric	eric.vanosten@gmail.com	Your Career as a Medical Coder	Exercise 1: Short Answer

Instructors can enter a score and feedback in the text boxes provided. This feedback will appear in the "Instructor's Feedback" area of the student's dashboard.

## GRADEBOOK

Each class within Medical Coding Lab has a gradebook that can be incorporated into a Learning Management System (LMS).

### Opening the Gradebook

From the instructor dashboard, instructors click "Gradebook."

**Class Title: Medical Coding**

### Class Level Details

Student performance reports appear across the bottom of the page. Information there includes names, e-mail addresses, progress status, overall average grade, time spent on the lesson, and links to be able to view more details of individual students and compare them against the class average.

Gradebook Details						
Reveal grade:		All Assignments				
Name	Email	Status	Grade (%)	Details	Time Spent	Compare
Van Osten, Eric	eric.vanosten@gmail.com	In Progress	58	<a href="#">View Details</a>	0h 8m 12s	<a href="#">Compare</a>

## Reviewing Student Performance

There are a number ways to review student work.

### Lesson Level

The "Student Search" option allows the instructor to find a particular student by using the student's name or e-mail address.

Student Search

Clicking "View Details" allows instructors to see a student's grades broken down by each lesson.

Gradebook Details						
Reveal grade:		All Assignments <span>?</span>				
Name	Email	Status	Grade (%)	Details	Time Spent	Compare
Van Osten, Eric	eric.vanosten@gmail.com	In Progress	58	<a href="#">View Details</a>	0h 8m 12s	<a href="#">Compare</a>

Details in the Lesson Level view include the lesson name, status, grade for each individual lesson, time spent on the lesson, and a link to view more details of each lesson.

### Activity Level

From the Lesson Level screen, clicking "View Details" will bring instructors to the Activity Level page, where they can see the student's status, score, number of attempts, time spent, and any feedback for each activity within a lesson.

Lesson Name	Status	Grade (%)	Details	Time Spent
Your Career as a Medical Coder	In Progress	58	<a href="#">View Details</a>	0h 8m 12s
The Regulatory Environment of Coding	Not Started	NA	<a href="#">View Details</a>	0h 0m 0s
ICD-10-CM Basics	Not Started	NA	<a href="#">View Details</a>	0h 0m 0s

Type	Title	Due Date	Completed Date	Status	Score(%)	Attempts	Time Spent	Final Scores	Feedback /Comments
E-book	e-Chapter			Viewed/ Attempted	Non-gradeable exercise	NA	NA		
Flash Cards	Exercise 1: Flash Card			Viewed/ Attempted	Non-gradeable exercise	NA	NA		
Don't Tip the Scale	<a href="#">Exercise 1: Don't Tip the Scale</a>	March 18,2016	March 7,2016	Completed	40	1	0h 1m 45s	<input type="text" value="40"/>	
Short Answer	<a href="#">Exercise 1: Short Answer</a>	March 18,2016	March 7,2016	Completed	75	1	0h 6m 27s	<input type="text" value="75"/>	<a href="#">View Details</a>

Instructors can override scores of any completed activity by clicking in the "Final Scores" column, replacing the percentage score, and then clicking "Save Final Scores." These scores will report back to both the instructor and student gradebooks.

[COMPARE WITH CLASS](#) [SAVE FINAL SCORES](#)

Type	Title	Due Date	Completed Date	Status	Score(%)	Attempts	Time Spent	Final Scores	Feedback /Comments
Don't Tip the Scale	<a href="#">Exercise 1: Don't Tip the Scale</a>	March 18,2016	March 7,2016	Completed	40	1	0h 1m 45s	<input type="text" value="40"/>	
Short Answer	<a href="#">Exercise 1: Short Answer</a>	March 18,2016	March 7,2016	Completed	75	1	0h 6m 27s	<input type="text" value="75"/>	<a href="#">View Details</a>

Diagram illustrating the process to override scores: 1. Click on the Final Scores column (40). 2. Click on the SAVE FINAL SCORES button.

### Compare

There are two ways to compare a student's work against the average score of the full class either from Gradebook Details, clicking the "Compare" link in the last column, or from the "Compare with Class" button on the Lesson Level and Activity Level pages.

## Learning Management System Functionality

Medical Coding Lab has the ability to integrate with a number of learning management systems (LMSs).

## Export Gradebook

Clicking the "Export Gradebook" button allows instructors to choose which LMS they use. A spreadsheet is generated that can be edited and uploaded to the LMS. The question mark icon next to the button provides links to more details about each option. For students to appear correctly in the

instructor's exported gradebook, the instructor must assign each student an LMS username using the Batch Manage LMS User Names or Manage Students functions.

Security Answer

☐ Email me occasional updates about my account activity, product updates, and special offers. (You can unsubscribe at anytime)

☐ I agree to the [Terms of Use](#) and [Privacy Policy](#).

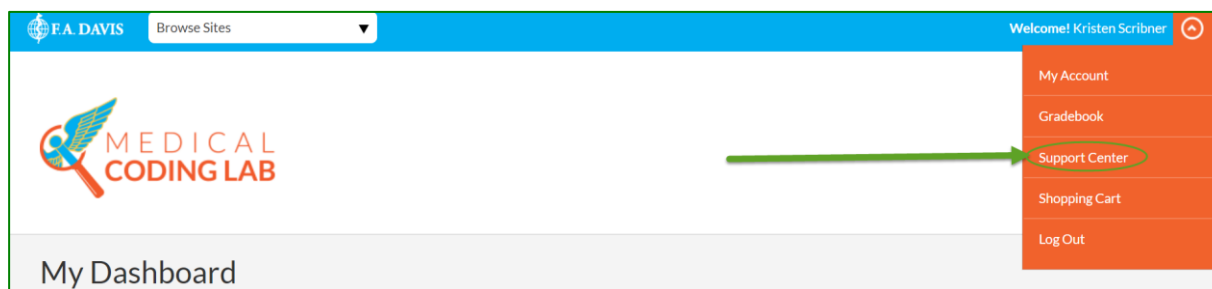

Finish

Add the book to your Vital Source bookshelf.

## TECHNICAL SUPPORT

If instructors have any problems with the product, they should call 888-323-2847 or e-mail [support@fadavis.com](mailto:support@fadavis.com). They should also review the online Support Center, which offers helpful videos and other support information. The Support Center link is at the top right of the dashboard, in the drop-down menu.

Instructors may choose from a variety of sources for help and support, including videos, documents, and connections to our customer service representatives.
