Access to Medical Coding Lab is acquired by redeeming an access code, purchased either through a code on the inside cover of a new book, a physical access card, or digital “instant access” sale. Medical Coding Lab is an online interactive program designed to make this complex subject matter easier for students to master. The content coordinates with the title “Conquer Medical Coding: A Critical Thinking Approach with Coding Simulations” by Jean H. Jurek, Stacey Mosay, and Daphne Neris.

Medical Coding Lab is compatible with Internet Explorer 9+, and the latest versions of Mozilla Firefox, Google Chrome, and Apple Safari. It also incorporates responsive design, which means it should work on most mobile devices as well as home computers.

Certain exercises found on Medical Coding Lab require Adobe Flash Player. Adobe Acrobat or Adobe Reader is required to view PDF files available. JavaScript needs to be enabled to view certain features of the program.

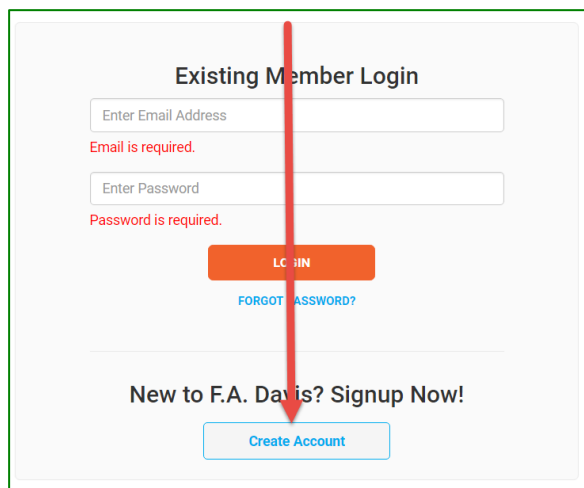

CREATING AN ACCOUNT

Creating an account only takes a moment.

To begin, go to www.MedicalCodingLab.com and click the “Login/Join” button, located in the top right corner of the homepage.

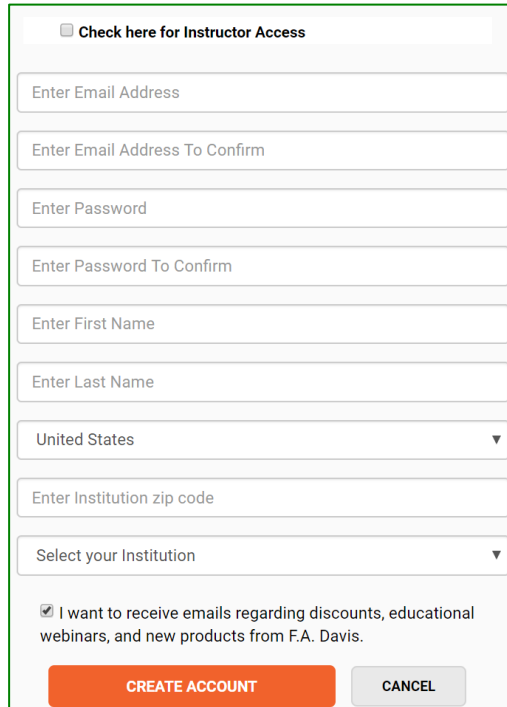

To create an account, click the “Create Account” button.

Next, enter your account credentials:

1. **Do not** click the box next to “*Check here for Instructor Access.*”
2. Enter your e-mail address.
3. Create your password.
4. Enter your name.
5. Enter your school information.
6. Click the “Create Account” button.

ACCESS CODE

Acquire access to the product either by entering a previously purchased access code or by purchasing instant access online. If you have previously registered with F. A. Davis, you will need to click the “Enter/Buy Access Code” link to choose whether to purchase or redeem.

CLASS ID

You must enter a Class ID in order for your instructor to see your work. The Class ID will be provided to you by your instructor.

Join a Class

If you are part of a class, your instructor will give you a class ID that will link you to the assignments associated with that class. If you have an ID, enter it in the box below.

By entering a Class ID, you give your instructor permission to monitor your progress and modify the default settings for this product, such as access to topics and activities and progress.

Your instructor will need to confirm your enrollment before you gain access to the class.

To avoid losing any work based on instructor class set up preference, we strongly recommend waiting to complete any work until you are accepted into your instructor's class.

If you join a class, your Independent Study will no longer appear on your dashboard.

Class Code:

[How do I Find My Class ID?](#)

SKIPJOIN CLASS

Once the instructor has accepted you into the class, you will be able to access the materials they have prepared for you by clicking on the “Enter” button (see next section).

DASHBOARD

After logging into Medical Coding Lab, the dashboard will be displayed. Initially the student will not see any classes. However, upon entering the Class ID and receiving the instructor’s acceptance, the class will appear.

Your Career as a Medical Coder	Progress: 1/3	View
The Regulatory Environment of Coding	Progress: 0/3	View
ICD-10-CM Basics	Progress: 0/3	View

ACCESSING ACTIVITIES

To access an activity, students click the lesson to expand its content. There are many activities available in each lesson. Students click on each to expose the activity links and begin working.

Your Career as a Medical Coder Progress: 1/3

E-BOOK

- FLASH CARDS
- DON'T TIP THE SCALE
- SHORT ANSWER
- ANALYZE THE CODES
- CASE STUDIES

e-Chapter
 Not Started | Non-gradable
 Start Date: March 07, 2016
 End Date: NA

Progress

Each lesson has a progress bar that turns blue as activities are completed.

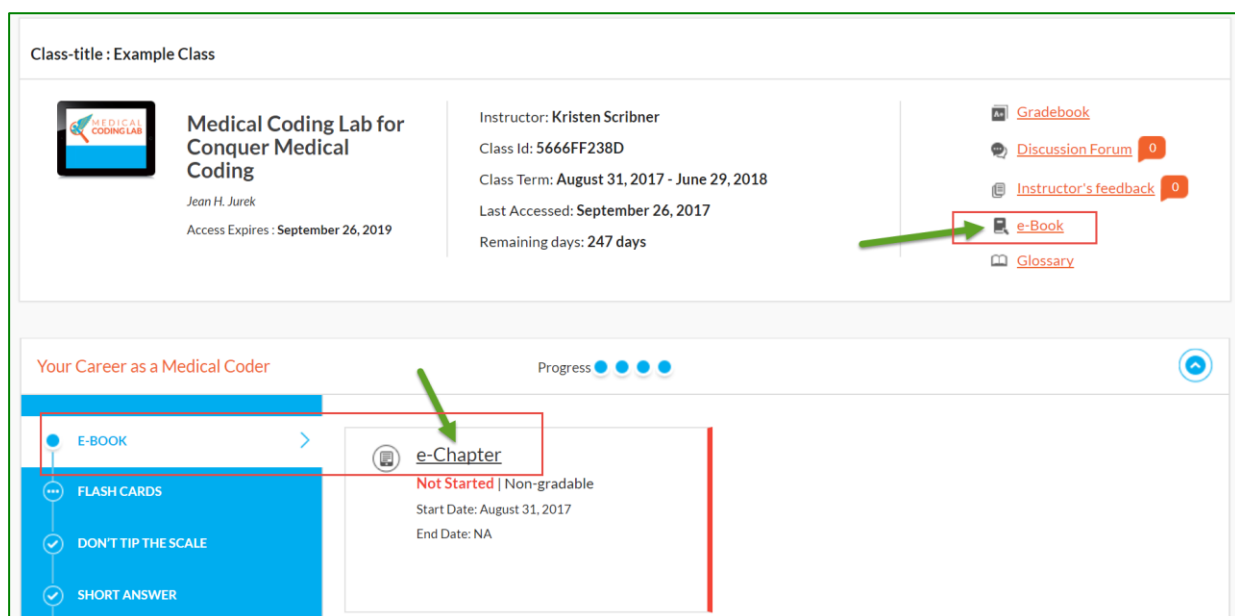

Activity Types

Medical Coding Lab offers a number of activity types for the students to complete.

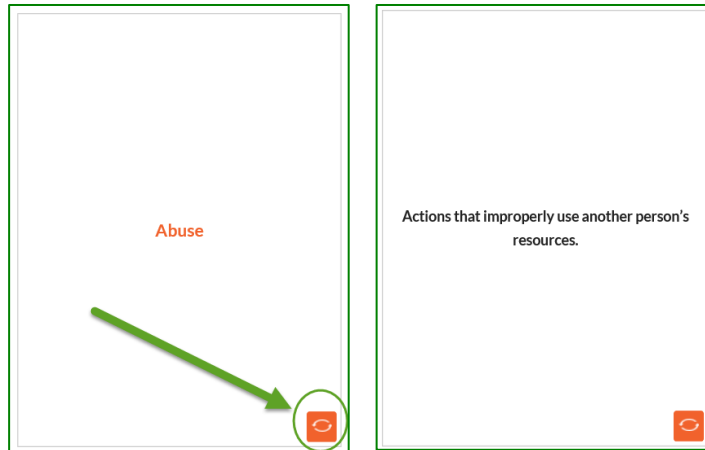

e-Book by Lesson

The interactive e-Book can be accessed directly in the product, divided by lesson. Students can alternatively access the comprehensive e-Book through the “e-Book” link at the top of the page.

Flash Cards

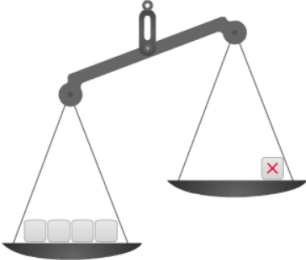

Key terminology is presented in electronic flash cards. Like the rest of the product, these cards can be accessed on handheld devices so that students on-the-go can review them wherever they are, whenever they want.

Don't Tip the Scale

This is a terminology game in which students are provided a clue about a term and then select letters to spell it. Guessing too many incorrect letters causes the scale to tip.

1. Legislation designed to protect people's private health information

H _ _ _ A A

A	B	C	D	E	F	G	H	I	J	K	L	M
N	O	P	Q	R	S	T	U	V	W	X	Y	
Z												

SUBMIT

Question 1 of 5

Short Answer

Students type answers to the questions in the fields provided and then submit. These questions are not automatically scored; the instructor needs to manually review them or set them up as Group Assignments.

1. Medical coders need to protect the information in a patient's records, especially when it comes to sharing the information with providers and payers. Explain the four main purposes of the **Health Insurance Portability and Accountability Act (HIPAA)** law. What are the three key HIPAA administrative simplification provisions? Describe the four ways in which the **HIPAA** law helps coders to protect patient information.

SUBMIT

Question 1 of 1

Analyze the Codes

CPT lessons include this activity, in which the student selects all of the pertinent elements for an accurate CPT code assignment. Other elements may be provided that would not be appropriate for that code.

1. Which of the following options apply to code 45330? *Select all that apply.*

- ☐ A. Diagnostic
- ☐ B. Therapeutic
- ☐ C. Before splenic fissure
- ☐ D. Beyond splenic fissure
- ☐ E. To cecum
- ☐ F. Biopsy
- ☐ G. Forceps
- ☐ H. Brushing

SUBMIT Question 1 of 2

Build Medical Codes

For ICD-10 lessons, students are provided case scenarios and then continue to code the patient diagnosis through a drag-and-drop activity. Correct answers are provided after the student submits the work.

1. What is the diagnosis code for diabetic ulcer?

Category Subcategory

Category Subcategory

E10	E11	B95	.621	.622	.620
L97	L03	A49	.424	.524	.504
			.404	.423	.02
			.116	.61	.62

SUBMIT Question 1 of 4

Case Studies

A short patient scenario is provided, followed by multiple choice questions. Correct answers are provided after the student submits the work. If students need to review the scenario while answering questions, they may click on the “**View your case**” dropdown at the top to reveal the text.

Exercise 1: Multiple Choice Questions

Medical Coding Lab for Conquer Medical Coding 2017
by Jean H. Jurek

[CPT: Medicine Codes](#) Quick Jump to Activities

Practice Mode

[View your case](#)

Kyle is a 12-year-old patient who presents to his pediatrician today for an annual wellness examination. Kyle is due for his MMR vaccine today and the provider discusses the HPV vaccine with Kyle as well as his mother. The provider spends approximately 15 minutes explaining both vaccines and answering some concerning questions Kyle's mother has regarding boys receiving HPV and other concerns that center on the MMR immunization.

1. What is the correct Current Procedural Terminology (CPT) code for the measles, mumps, and rubella (MMR) vaccine?

- ☐ A. 90704
- ☐ B. 90705
- ☐ C. 90706
- ☐ D. 90707

[SUBMIT](#) Question 1 of 6

Capstone Cases

In this area, a more complicated patient scenario is provided, often with comprehensive operative notes, radiology reports, or physician notes, followed by multiple choice questions. Correct answers, with rationales, are provided after the student submits the work. This is a standalone section with a total of 15 cases; each Capstone Case requires knowledge about ICD-10, CPT, and HCPCS coding. Lesson case studies (see above) require knowledge only of that particular lesson. Again, if students need to review the scenario while answering questions, they may click on the dropdown at the top to reveal the text.

CASE STUDIES

Case 1: Stephanie Miller; Topic: Uro/Gen

In Progress

Start Date: Not Set

Due Date: NA

Case 2: Ronald Blackwood; Topic: Endo

In Progress

Start Date: Not Set

Due Date: NA

View your case

SUBJECTIVE: Ronald is here for his diabetes 6-month follow up. He rarely checks his blood sugar—he has done so only two or three times in the last 2 weeks—and he is noncompliant with medication. He has had diabetes for 7 years. It has been in the 140s for 2 hours postprandial. He is off all medications for blood pressure and diabetes. He lost 6 pounds before the last visit and lost another 7½ pounds by today's visit because of dietary changes. His BMI is 30.2. He does get some heartburn. Two months ago, he had chest pain for a half a day with some shortness of breath, which totally resolved. By history, it really doesn't sound cardiac. We discussed multiple related aspects of diabetes monitoring and lifestyle interventions.

OBJECTIVE: BP, 140/98. HR 72. Fundoscopic eye examination is negative. Nose, mouth, neck, and thyroid are negative. Heart is without murmurs. Good pulses. Lungs are clear; abdomen unremarkable. Feet do not show any injury or damage to the skin.

LABORATORY: ECG shows nonspecific ST changes only. Random Accu-Chek, 267; hemoglobin A1c, pending. Chest x-ray is unremarkable.

ASSESSMENT:

1. Type 2 diabetes, suboptimal control
2. Overweight but improving
3. Elevated blood pressure
4. Noncompliance with medical therapy
5. Chest pain

PLAN: Await hemoglobin A1c. Redouble efforts in diabetes monitoring. Recheck blood pressure in 2 weeks. The patient was instructed to call immediately if chest pain returns, but no further workup is done at this time. The patient is to return in 3 months when we will check his kidney status again, earlier PRN.

1. The vital signs noted in the examination according to 1997 Documentation Guidelines (DGs):

- ☐ A. Meet the requirements with two vitals documented
- ☐ B. Do not meet the DGs because of only one blood pressure reading being documented
- ☐ C. Do not meet the DGs because a minimum of three vital signs must be documented to support this bullet
- ☐ D. Do not meet the DGs because ALL vitals listed in 1997 DGs must be documented

SUBMIT Question 1 of 5

PRACTICE MODE

Before students begin working on an activity, they should check to see if they are in “**Practice Mode.**” The words “Practice Mode” will be displayed on the top right corner of the screen.

Medical Coding Lab for Conquer Medical Coding

by Jean Jurek

[ICD-10-CM Lessons 1 through 5: A00-F99](#)

[Quick Jump to Activities](#)

Practice Mode

1. Systemic infection that can begin with a localized infection

In Practice Mode, students may practice as many times as desired by choosing “Review” when they complete an activity. They may choose to submit work to the gradebook by clicking “Grade” when ready (up to the instructor’s designated deadline).

Important

You have reached the end of the activity.

Select **GRADE** to submit and record your score in your gradebook.

Select **REVIEW** to see how you did (Practice Mode).

Select **CANCEL** to exit and return to the activity.

GRADE**REVIEW**

Cancel

Work completed in Practice Mode will not be submitted to the student's gradebook until students click the "Grade" button. However, work performed in Practice Mode does count toward "viewed/attempts" and "time spent" in the gradebook. After initial review, the results in Practice Mode cannot be reviewed again after closing out of the feedback screen.

Activities appear as "complete" only after being submitted and after the feedback screen appears. It is recommended that students complete exercises completely before leaving the program, to avoid potentially losing work.

If a student is not in Practice Mode, the top right corner of the activity screen will be blank. In that case, the grade will be submitted to the student's gradebook when "Grade" is clicked.

TEST BANK ASSIGNMENTS (For MCL 2018)

To access a test bank assignment, click **VIEW TEST BANK ASSIGNMENTS** from the Medical Coding Lab Dashboard. Then, click **TAKE ASSIGNMENT**.

Class Title : Example Class

Instructor Name : Kristen Scribner

Description :

Class Term : January 09, 2018 - December 31, 2018

Last Access : January 09, 2018

Remaining Days : 356

[Next Due Assignment](#) [Instructor's Feedback](#) [Discussion Forum](#)[My Gradebook](#)[View Test Bank Assignments](#) **ENTER****Test Bank Assignments**

Assignment Name	Start Date	Due Date	Status	Grade %	Time Spent	Action
Test Bank Assignment 5 01-10-2018	January 10, 2018	May 31, 2018	Not Started	NA	0h 0m 0s	Take Assignment

Taking Test Bank Assignments

After clicking **TAKE ASSIGNMENT**, you'll continue to the questions. Click **SUBMIT** after answering each one. After completing the test bank assignment, a results page shows you the questions, lists of answers, the answers you selected, the correct answers, your overall score, and the option to print. This same page appears when you select to **VIEW RESULTS** from the Test Bank Assignments page. Scores from this page are recorded to the Gradebook.

Score: 4/5

PRINT

1. Match the following definition with their term:
Part of the provider's defense against accusations that patients were not treated correctly

- ☐ A. Clinical departments

TECHNICAL SUPPORT

If students have any problems with the product, they should call 888-323-2847 or e-mail support@fadavis.com. They should also review the online Support Center, which offers helpful videos and other support information. The Support Center link can be found at the top right of the dashboard, in the drop-down menu.

Students may choose from a variety of sources for help and support, including videos, documents, and connections to our customer service representatives.
