WCAG & Section 508

Version 2.3 (Revised) - April 2019

About This Document

The VPAT is provided in four editions based on the guidelines/standards being evaluated. The editions are WCAG, Revised 508, EN 301 549 and International that includes all of the standards.

This is a modified version of the WCAG 2.1 VPAT that includes both WCAG and Section 508. It includes the following standards/guidelines:

- [Web Content Accessibility Guidelines 2.0](#)

- [Web Content Accessibility Guidelines 2.1](#); use is optional; included for reference purposes

- [Revised Section 508 standards published January 18, 2017 and corrected January 22, 2018](#)

Table Information for VPAT® Readers

For each of the standards, the criteria are listed by chapter in a table. The structures of the tables are: the first column contains the criteria being evaluated, the second column describes the level of conformance of the product regarding the criteria and the third column contains any additional remarks and explanations regarding the product.

- When sections of criteria do not apply, or deemed by the customer as not applicable, the section is noted as such and the rest of that table may be removed for that section.

- When multiple standards are being recorded in this document, the duplicative sections are noted and responded to only one time. The duplicate entry will note the cross reference to the data.
