“WE ARE NOT REALLY IN DOUBT ABOUT THE MORE SERIOUS OF OUR SHARED AIMS. WE KNOW WHAT THEY ARE. WE KNOW THEY ARE DIFFICULT. AND WE KNOW THAT WE HAVE NOT ACHIEVED THEM.”

Dear Educator,

What makes us different?

In 1964, Martha E. Rogers, Chairperson of the Department of Nursing Education, New York University, came out with a small red and white volume, soft-covered and a total of 96 pages, titled Reveille in Nursing, published by F. A. Davis. It was a book, she was later to comment, “that scared the pants off a lot of people.” Fifty years later, much has changed, but much remains the same. In a world increasingly dominated by consolidation in both publishing and health care, F. A. Davis is still independent and family owned, and Advanced Practice Nurses are still leading the charge toward the patient-centered care that will improve the quality of health care for all of us.

Engaging students. Empowering educators.

Please take a moment to review our 2017-2018 catalog. Our titles are written by APNs for APNs—a difference that is important to us and of which we are very proud because it reflects our commitment to listen to you and respond with the resources and support you need to ensure outstanding outcomes for your students. Our goal is to help your students master the knowledge they need to take them to the next level...and the teaching tools you need to make sure they succeed. You’ll not only find titles that span the APN curriculum, but also a wealth of resources online at DavisPlus that enrich the learning experience for your students and let you spend less time preparing and more time teaching.

Building the future.

We share your dedication to the advancement of nursing knowledge and the education of nurses, and recognize the challenging, yet rewarding path advanced practice nurses have embarked on and the very special nature of those who have chosen it.

If we can assist in any way, please call on us.

Pharmacotherapeutics for Advanced Practice Nurse Prescribers, 4th Edition
Teri Moser Woo, RN, PhD, CPNP-PC, FAANP
Marylou V. Robinson, PhD, FNP-C

The right drug...for the right patient...at the right time
Here’s the in-depth information your students need to become safe and effective prescribers of medication, written by APRNs for APRNs. They’ll learn how to apply pharmacologic principles to clinical practice, understand diagnostic and treatment reasoning, and make rational drug selections.

Put the best research and evidence-based knowledge to work...
- Tables that detail commonly used drugs, pharmacokinetics, drug/food interactions, dosage schedules, and available dosage forms
- Easy-to-understand illustrations of drug physiology and how drugs work in the body
- Drugs and management for acute and chronic pain across the lifespan, including assessment tools for patients with dementia
- Coverage of the variations in pharmacokinetics in the pediatric and geriatric populations
- Coverage of ethnopharmacology, pharmacogenomics, and pharaco-economics in prescribing
- NEW! Full-color design and animations of drug mechanisms of action

CONTENTS
I. The Foundation
1. The Role of the Nurse Practitioner as Prescriber
2. Review of Basic Principles of Pharmacology
3. Rational Drug Selection
4. Legal and Professional Issues in Prescribing
5. Adverse Drug Reactions
6. Factors That Foster Positive Outcomes
7. Cultural and Ethnic Influences in Pharmacotherapeutics
8. An Introduction to Pharmacogenomics
9. Nutrition and Nutraceuticals
10. Herbal Therapy and Nutritional Supplements
11. Information Technology and Pharmacotherapeutics
12. Pharmacoeconomics
13. Over-the-Counter Medications
II. Pharmacotherapeutics with Single Drugs
14. Drugs Affecting the Autonomic Nervous System
15. Drugs Affecting the Central Nervous System
16. Drugs Affecting the Cardiovascular and Renal Systems
17. Drugs Affecting the Respiratory System
18. Drugs Affecting the Hematopoietic System
19. Drugs Affecting the Immune System
20. Drugs Affecting the Gastrointestinal System
21. Drugs Affecting the Endocrine System
22. Drugs Affecting the Reproductive System
23. Drugs Affecting the Integumentary System
24. Drugs Used in Treating Infectious Diseases
25. Drugs Used in Treating Inflammatory Processes
26. Drugs Used in Treating Eye and Ear Disorders
27. Anemia
28. Chronic Stable Angina and Low-Risk Unstable Angina
29. Anxiety and Depression
30. Asthma and Chronic Obstructive Pulmonary Disease

23. The 15-Minute Hour: Practical Psychotherapy for Primary Care
24. Putting Caring Into Practice: Caring for Self

Appendices
A. Physiological Influences of the Aging Process
B. Laboratory Values in the Older Adult
C. Common Tests and Their Associations With Diseases and Conditions

Primary Care: The Art and Science of Advanced Practice Nursing, 4th Edition
Lynee M. Dunphy, PhD, APRN, FNP-BC, FAAN
Jill E. Winland-Brown, EdD, APRN, FNP-BC
Brian Oscar Porter, MD, PhD, MPH
Debora J. Thomas, DNS, RN, FNP-APN

The premier reference for APNs providing primary care!
Written by nurse practitioners for nurse practitioners in collaboration with a physician, this popular text builds a solid understanding of the diagnosis and treatment of diseases and disorders of every body system as well as men’s health, women’s health, and psychosocial problems across the lifespan. The Circle of Caring practice model on which it’s based aligns the empirics of evidence-based practice with the problem-solving prism of the nursing process, supporting and empowering collaboration across the entire multidisciplinary team.

Builds a solid foundation for practice.
- The art and the science of primary care practice as well as the newest evidence and changes in health care, including coverage of healthcare reform
- Coverage of pathophysiology, diagnostic reasoning, evidence-based practice, geriatrics, and pediatrics
- The differences in caring for older and younger patients
- List of common ICD-10 codes on the inside back cover with index citations to the disorder
- Emphasis on evidence-based practice with information on evidence Levels 1 and 2 with references to primary studies, as well as more Level 1 throughout the text.
- OSEN content
- Enhanced teaching and learning resources online at DavisPlus
Advanced Assessment
Interpreting Findings and Formulating Differential Diagnoses, 3rd Edition
Mary Jo Goolsby, EdD, MSN, ANP-C, CAE, FAANP
Laurie Grubbs, PhD, MSN, ANP-C
Take your students beyond the identification of physical assessment abnormalities to an accurate diagnosis.
Step by step, your students will hone their abilities to perform effective health assessments, obtain valid data, interpret the findings, and recognize the range of conditions that can be indicated by specific findings to reach an accurate differential diagnosis. Its complaint-focused approach covers 170 symptoms.
Meets the needs of today’s APNs...
- Thoroughly updated, including more references that support evidence-based practice
- Discussions on diagnosing complex conditions
- Full-color dermatology and abnormal findings atlas
- Quick-reference features, including red flags • assessment pearls • medications causing symptoms • selected causes of symptoms
- Step-by-step how-tos for taking a focused history, performing a physical based on presenting complaints/problems, and interpreting the findings
- Guidance on selecting and interpreting diagnostic studies as well as prediction rules for specific findings
- Prediction rules for selected disorders
CONTENTS
I. The Art of Assessment and Clinical Decision-Making
1. Assessment and Clinical Decision-Making: An Overview
2. Genomic Assessment: Interpreting Findings and Formulating Differential Diagnoses
II. Advanced Assessment and Differential Diagnosis by Body Regions and Systems
3. Skin
4. Head, Face, and Neck
5. The Eye
6. Ear, Nose, Mouth, and Throat
7. Cardiac and Peripheral Vascular Systems
8. Respiratory System
9. Breasts
10. Abdomen
11. Genitourinary System
12. Male Reproductive System
13. Female Reproductive System
14. Musculoskeletal System
15. Neurological System
16. Nonspecific Complaints
17. Psychiatric Mental Health
III. Assessment and Differential Diagnosis in Special Patient Populations
18. Pediatric Patients
19. Pregnant Patients
20. Older Patients
Assessment/Certification Review

Nurse Practitioner
Certification Examination and Practice Preparation, 5th Edition
Margaret. A. Fitzgerald, DNP, FNP-BC, NP-C, FAAN, CSP, FAAN, DCC

Prepare your students for their future...today!
The New Edition of this award-winning text, written by renowned NP educator and certification preparation expert Dr. Margaret Fitzgerald, teaches the how, what, and why of NP practice that are critical to passing the NP boards.

Key information about pathophysiology, mechanism of disease, physical assessment, differential diagnosis, pharmacodynamics, and pharmacokinetics promotes the sound clinical reasoning skills needed to succeed on the NP boards and in practice.

Gain critical knowledge essential for exam preparation and practice.
- More than 2,300 practice questions (with detailed rationales) that represent every major clinical condition
- UPDATED & REVISED! Thoroughly updated and revised to reflect the latest guidelines, recommendations, diagnostic and treatment protocols, and procedures
- NEW! Full-color design with full-color photographs integrated throughout
- Over 175 quick-look tables on common clinical conditions to facilitate learning and practice
- In-depth discussions of disorders with the appropriate diagnoses and treatments
- Emphasis on analysis and synthesis of knowledge to enhance diagnostic and treatment reasoning skills
- Special introduction on test-taking strategies to help unlock challenging question stems
- Chapter on professional issues with key information for the exam and practice
- Online Question Bank on DavisPlus that lets students create quizzes for study on-the-go

CONTENTS
Introduction: Understanding Test Design and Theory
1. Health Promotion and Disease Prevention
2. Neurological Disorders
3. Skin Disorders
4. Eye, Ear, Nose, and Throat Problems
5. Cardiac Disorders
6. Respiratory Disorders
7. Gastrointestinal Disorders
8. Male Genitourinary System
9. Musculoskeletal Disorders
10. Peripheral Vascular Disease
11. Endocrine Disorders
12. Renal and Urinary Tract Disorders
13. Hematological and Select Immunological Disorders
14. Psychosocial Disorders
15. Female Reproductive and Genitourinary Systems
16. Older Adults
17. Pediatrics
18. Childbearing
19. Professional Issues

Family Practice and Adult-Gerontology
Primary Care Nurse Practitioner
Certification Examination
Review Questions and Strategies, 5th Edition
Jill E. Winland-Brown, EdD, APRN, FNP-BC
Lynne M. Dunphy, PhD, APRN, FNP-BC, FAAN

Ensure your students’ success on their certification exams.
Give your students the extra advantage on their FNP or AGNP exams with an effective plan of action.
1. Formulate a strategy.
2. Master core content areas.
3. Assess progress.
4. Test knowledge.

Practice, practice, and more practice
The questions in the book and online at DavisPlus parallel the domains and content areas of the actual exams to ensure your students sit with confidence.
Each question has been carefully reviewed and updated by recent exam takers to ensure accuracy and revised to conform to the style and difficulty levels on the certification examinations.
- Over 2,200 questions in all
- Rationales for correct and incorrect answers
- One, 150-question comprehensive practice exam
- Online Question Bank on DavisPlus that lets students create quizzes by chapter topic and domain of practice

CONTENTS
I. Introduction
1. Achieving Success on a Certification Examination
2. Test-Taking Skills and Designing Your Study Plan for APRN Certification

II. Evaluation and Promotion of Client Wellness
3. Health Promotion
4. Care of the Emerging Family
5. Growth and Development
6. Health Counseling

III. Assessment and Management of Client Illness
7. Neurological Problems
8. Integumentary Problems
9. Head and Neck Problems
10. Respiratory Problems
11. Cardiovascular Problems
12. Abdominal Problems
13. Renal Problems
14. Male Genitourinary Problems
15. Female Genitourinary Problems
16. Musculoskeletal Problems
17. Endocrine and Metabolic Problems
18. Hematological and Immune Problems

IV. Issues in Primary Care
19. Issues in Primary Care

V. Practice Examinations
Examination 1
CLINICAL SPECIALTIES

Adult Care/Gerontology

Advanced Practice Nursing in the Care of Older Adults
Laurie Kennedy-Malone, PhD, GNP-BC, FAANP, FGSA
Kathleen Ryan Fletcher, RN, DNP, GNP-BC, FAAN
Lori Martin-Plank, PhD, FNP-BC, NP-C, GNP-BC, FAANP

Prepare your students to meet the needs of this growing population!
From theories of aging and initial assessment through the treatment of disorders, including complex illnesses, this evidence-based text provides the comprehensive gerontological coverage your students need to care for older adults in various settings.

Tools and techniques to enhance wellness, function, and independence
- Body systems chapters covering common disorders in the older adult with descriptions of variations in presentation and treatment from the younger adult
- “Signal Symptoms” boxes to quickly target potential differential diagnoses
- Evidence-based citations to support practice and evidence levels

Psychiatric/Mental Health

Psychiatric Advanced Practice Nursing
A Biopsychosocial Foundation for Practice
Eris F. Perese, APRN-PMH
Implement a holistic approach to primary and outpatient psychiatric care. Using a biopsychosocial model, this text addresses mental health issues through stabilization of brain chemistry, individualized psychotherapy, and re-socialization into the community.
Take an in-depth look at specific psychiatric disorders, including their epidemiology, etiology, biological basis, clinical presentation of adults, older adults, and children, co-morbidities, differential diagnosis, and treatment. There is also comprehensive coverage of the interventions and “Levers of Change” used to aid patients in their recovery, as well as preventative interventions.

Builds a solid biopsychosocial foundation.
- Essential content, including theoretical foundations of practice, such as Modeling and Role-Modeling, a biopsychosocial nursing theory of adaptation, and Kandel’s theory of brain neuroplasticity
- Examination of mental health disorders associated with military service
- Content that meets the requirements of the American Nurses Credentialing Center (ANCC) with coverage of psychotherapy, psychosocial interventions, and pharmacologic management

NEW EDITION!

Psych Notes
Darlene D. Pedersen, MSN, APRN, PMHCNS
Perfect in any setting!
This pocket guide delivers quick access to need-to-know information on basic behavioral theories, key aspects of psychiatric and crisis interventions, mental status assessments and exams, mental health history and assessment tools, and so much more.
LEADERSHIP

The New Leadership Challenge
Creating the Future of Nursing, 5th Edition
Sheila C. Grossman, PhD, FNP-BC, APRN, FAAN
Theresa M. Valiga, EdD, RN, CNE, ANEF, FAAN

Prepare your students to lead.
Whatever their role, practice or educational environment, this interactive approach helps them identify the characteristics of leaders and followers, and illustrates not only how, but also when to use the qualities associated with each to achieve professional and personal success.

Show them how to affect positive change...for themselves and others.
- NEW! Chapter that presents classic and contemporary leadership theories
- EXPANDED! More coverage of timely topics, including the globalization of health care, the aging population, and health care delivery settings
- A focus on personal leadership development, as well as the distinction between leadership and management
- A student-tested, Grossman and Valiga Leadership Characteristics and Skills Assessment tool

Complexity Leadership
Nursing’s Role in Health Care Delivery, 2nd Edition
Diana M. Crowell, PhD, RN, NEA-BC

Prepare your students to lead in today’s complex health systems!
Introduce your students to complexity science and the complexity model of contemporary leadership. They’ll explore how to lead in complex systems and chaos, how complex systems function, and how to navigate them successfully.

Solve problems. Create optimal outcomes.
- EXPANDED! Coverage of Clinical Nurse Leaders (CNL) and Doctor of Nursing Practice (DNP), nursing administrators, and nurse executives
- EXPANDED & UPDATED! Coverage of transformational Leadership (TL), microsystems, leadership skills, and organizational culture
- NEW! Section on becoming a conflict-competent leader and developing conflict competence
- Self-reflective assessment tools, case studies, and exercises

Leadership and the Advanced Practice Nurse
The Future of a Changing Healthcare Environment
Diane Whitehead, EdD, DNP, RN, ANEF
Patricia Welsh Dittman, PhD, MSN, CDE
Denise McNulty, DNP, MSN, RN-BC, ARNP

Envisioning a better future...
Prepare your students to lead the way to better outcomes...for their patients, their teams, their institutions, and themselves. They’ll not only learn about leadership, but also how to use their skills to manage staff, implement policy changes, and to develop systems that deliver cost effective, quality-controlled care. The coverage encompasses the competencies required by the American Association of Colleges of Nursing in conjunction with major specialty nursing organizations.

Empowering your students to lead...
- The essential theoretical foundations for empowering nurses to be leaders of change
- The influence of health policy and regulation on organizations
- How to empower nurses and inter-professional teams to reach organizational goals
- The importance of risk management and quality control for cost-effective care delivery
- The challenges of ensuring optimal patient care within a sustainable system
- Coverage of complexity science

Advanced Practice Nursing
Essentials of Role Development, 4th Edition
Lucille A. Joel, RN, PhD, FAAN

Prepare your students to thrive as APNs.
Noted nursing professionals and educators in the field share their expertise to provide your students with the non-clinical knowledge necessary for professional success in all APN specialties. They'll follow the evolution of the APN's role from a historical perspective to the present and examine the issues and challenges they'll encounter in the future.

- NEW CHAPTERS! Information Technology and the Advanced Practice Nurse, Public Policy and Writing for Publication
- NEW & EXPANDED COVERAGE! Palliative and end-of-life care • PhD vs. DNP • more comprehensive models, including ACOS, Medical Homes, and Navigator Models • focus on certification and the consensus model • comparison of scope between disciplines • pay for performance • alternate models for service delivery • content on reimbursement and billing and coding (ICD-10)
- Covers all APN specialties, including nurse educator and nurse administrator.
- Presents practical information balanced with theory.
- Links content to the AACN/NONPF core curriculum recommendations.

Available Now!
Advanced Practice Nursing
Essentials of Role Development, 3rd Edition
608 pages | 24 Illustrations | Soft cover | 2013
$81.95 (US) | $113.50 (CAN)
ISBN: 978-0-8036-2795-7

Transcultural Caring Dynamics in Nursing and Health Care, 2nd Edition
Marilyn A. Ray, RN, PhD, CTN
Take a dynamic approach to the study of culture and health care relationships.

Advanced Practice Nursing
Emphasizing Common Roles, 3rd Edition
Joan M. Stanley, PhD, RN, CRNP, FAAN
Explores the unique combination of knowledge, science, and practice that differentiates each APRN role.

612 pages | 25 Illustrations | Soft cover | 2011
$69.95 (US) | $96.95 (CAN)

Inquiry and Leadership
A Resource for the DNP Project
Kathy Reavy, PhD, RN
A practical, learner-focused approach to the scholarly project
Here’s the go-to guide your students need to understand, apply, and coordinate the process of evidence-based practice for their DNP scholarly or capstone projects. Step by step, they’ll learn everything they need to know to successfully complete their projects and develop the leadership skills that enhance the DNP’s role in practice.

Complete coverage...from proposal development to project presentation
- Reviews the theoretical and philosophical base of evidence-based practice and its importance to Advanced Practice Nursing.
- Explains the evidence-based practice process and its role in the scholarly project.
- Describes the rationales and tools for assessing the trustworthiness and application of the best available evidence.
- Discusses the process of translating research into evidence-based practice.
- Examines methods for evaluating research and determining the appropriate evaluation strategy for individual scholarly projects.
- Addresses the presentation and dissemination of project findings.
- Describes opportunities in translational science and encourages interdisciplinary and interprofessional collaboration in future scholarly activities.

Family Health Care Nursing
Theory, Practice, and Research, 6th Edition
Joanna Rowe Kaakinen, PhD, RN
Deborah Padgett Coelho, PhD, C-PNP, PMHS, CFLE
Rosa Steele, PhD, RN
Melissa Robinson, PhD, RN, CHPN, CDI
Achieve better outcomes through effective nurse-family partnerships.
Explore family nursing the way it’s practiced today—with a theory-guided, evidence-based approach to care throughout the family life cycle that responds to the needs of today’s families and adapts to the changing dynamics of the health care system. From health promotion to end of life, a streamlined organization parallels the trajectory of illness, incorporating caring for the family along this continuum of care across clinical specialties.

- UPDATED, REVISED & EXPANDED! Thoroughly reviewed and updated content throughout to reflect family nursing practice today
- NEW CHAPTERS! Spirituality and Gender Diverse Families
- EXPANDED! Coverage of family social policy and family education
- NEW THEORETICAL MODEL! Discussion of Transition Theory
- Case studies in clinical chapters along with useful family genograms and ecomaps that illustrate the discussions of five theoretical models...Family Ecological Theory • Family Resiliency Model • Family Systems Model • Family Life Cycle Model • Transition Theory
- Canadian-specific content throughout

Contemporary Nursing Knowledge
Analysis and Evaluation of Nursing Models and Theories, 3rd Edition
Jacqueline Fawcett, PhD, FAAN
Susan DeSanto-Madeya, RN, DNS
Nursing research demystified!
Step-by-step, two noted authors and educators show your students how to...find specific research in the literature...evaluate the methods used...determine if the findings support the theories and models that define nursing practice...and incorporate the results into the care they provide their patients. Using research studies from around the world, they also offer insights into the wide range of investigations nurses are conducting today.

Family-Focused Nursing Care
Sharon A. Denham, PhD, RN, CNE
Sandra Eggengerger, PhD, RN
Patricia Young, PhD, RN
Norma Krunwiede, EdD, RN
Nursing theories, evidence-based research, and case studies point the way.

Nurses and Families
A Guide to Family Assessment and Intervention, 6th Edition
Lorraine M. Wright, RN, PhD
Maureen Leahey, RN, PhD
Harness the power of the nurse-family relationship!
Genetics and Genomics in Nursing and Health Care, 2nd Edition
Theresa A. Beery, PhD, RN
M. Linda Workman, PhD, RN
Julia Eggert

Complex concepts made manageable!
Build the foundation your students need to understand the science of genetics and its growing role in the diagnosis and treatment of diseases and disorders. This guide provides the in-depth coverage and clinical examples your students need to grasp the basis of genetic inheritance, the influence of somatic and germline mutations, and the multifactorial relationship of gene-environment interactions.

- NEW! Full-color design to make the concepts easier to understand
- NEW CHAPTERS! Epigenetic Influences on Gene Expression and Autosomal Inheritance and Disorders
- EXPANDED & UPDATED! Coverage of sex chromosome and mitochondrial inheritance and disorders, genetic variation that increases the risk for development of specific cancers, and genetic and genomic testing
- Focuses on the genetic factors influencing the most common health problems.
- Disorders organized by a lifespan approach—childhood-onset vs. adult-onset
- Explains how to perform beginning genetic assessments, including the development of a three-generation pedigree for identification of genetic risks.
- Uses a consistent organization in every chapter that includes case presentations, clinical manifestations/assessment findings, interpretation of laboratory data, risks, potential complications, and nursing care needs.

CONTENTS
I. Basic Concepts from Molecular Genetics
1. DNA Structure and Function
2. Protein Synthesis
3. Genetic Influences on Cell Division, Cell Differentiation, and Gametogenesis
II. Gene Expression
4. Patterns of Expression
5. Epigenetic Influences on Gene Expression
6. Autosomal Inheritance and Disorders
7. Sex Chromosome and Mitochondrial Inheritance and Disorders
8. Family History and Pedigree Construction
9. Congenital Anomalies, Basic Dyomorphology, and Genetic Assessment
III. Genomic Health Problems Across the Life Span
10. Enzyme and Collagen Disorders
11. Common Childhood-Onset Genetic Disorders
